

**GORDON SETTER
CHIC DNA REPOSITORY
FOR GENETIC RESEARCH**

Directions for submitting DNA via Cheek Swab:

Cheek Swab kits can be obtained by contacting TarTan GSC at FH20vet@aol.com

Each individual plastic packet contains:

5 cheek swabs

5 name labels

**CHIC DNA Gordon Setter Application Form & Health Survey.
“The CHIC DNA Repository for Gordon Setters,” by Jerold S.
Bell, DVM.**

1. Please fill out the CHIC DNA Repository Application and Health Survey and sign it. Each individual dog will need a separate application form and health survey.
2. Print the registered name of the dog on each of the 5 name labels. Peel off the name label and apply one label to the reverse side of each of the 5 swab sleeves. Ignore the section on the reverse side of the swab sleeve that refers to ‘barcode label’ – that is for CHIC’s use.
3. Follow steps 1-4 on the reverse side of the swab sleeve to collect DNA from the dog. After collection, re-insert the swab back into the sleeve and return 4 (FOUR) swabs into the plastic bag. One swab is to be kept and stored by the owner for future genetic tests that may become available due to this program.
4. Place a 3-5 generation pedigree of the dog whose name is on the application form along with the cheek swabs and the CHIC DNA Application form/Health Survey back into the plastic bag. Seal the bag.
5. There is a \$5.00 fee per dog. Checks are to be made payable to: Canine Health Information Center. Please mail your check, the sealed plastic bag and its contents directly to:

Canine Health Information Center
2300 E. Nifong Blvd.
Columbia, MO 65201-3806

6. Thank you for participating in the CHIC DNA Repository.
